6th of October, Giza | Zagazig, Sharqia, Egypt | *Open to Relocation*

OBJECTIVE

Motivated Network Engineering student with a solid theoretical foundation in networking protocols, cybersecurity, and system administration. Seeking a challenging internship or entry-level opportunity to apply academic knowledge in routing, switching, and network security within a professional environment.

EDUCATION

B.Sc. in Network Technology (NT)

2023 – 2027

Faculty of Information Systems and Computer Science, 6th of October University

GPA: 3.09 Grade: Very Good (B)

ACADEMIC EXPERIENCE

Relevant Coursework

- Computer Networks & Data Communications
- Network Security & Cryptography
- Routing & Switching (CCNA-level topics)
- Operating Systems (Linux Administration)
- Database Management Systems

Network Lab Projects

- Designed and configured a scalable corporate network topology implementing OSPF, RIP, and BGP protocols for dynamic routing, and configured VLANs to optimize traffic.
- Set up firewall rules and VPN tunnels as part of network security coursework.
- Performed packet analysis using Wireshark to diagnose network issues.

TECHNICAL SKILLS

Networking & Protocols: TCP/IP, OSI Model, OSPF, RIP, BGP, VLANs, Switching & Routing

Security & Tools: Wireshark, GNS3, Cisco Packet Tracer, VPN & Tunneling, Network Security Basics

Operating Systems & Programming: Linux, Python (Networking Scripts), SQL (MySQL), Git & GitHub

SOFT SKILLS

Problem Solving, Team Collaboration, Continuous Learning

LANGUAGES

- Arabic — Native
- English — Professional Working Proficiency

CERTIFICATES

- Python for AI — Maharatech
